

AB-6007 - Secure and Govern your AI agent workforce

Overview

Course Duration: 1 Day

About This Course

Learn how to administer and secure AI agents in Microsoft 365 with Microsoft Agent 365. This course combines focused instruction with hands-on labs covering agent discovery, identity governance, data protection, and threat monitoring across the Microsoft 365 admin experience.

Audience Profile

Learners are expected to have worked familiarity with Microsoft 365 administration — including the Microsoft 365 admin center, Microsoft Entra basics (users, groups, Conditional Access), and core Microsoft Purview concepts. Prior experience with AI agents is not required. This course is intended for IT professionals responsible for administering Microsoft 365 environments that use AI agents, including:

- Microsoft 365 administrators
- Identity and access administrators
- Security and compliance administrators
- Cloud and platform administrators expanding into AI governance

Course Outline

Module 1: Explore Microsoft Agent 365

Microsoft Agent 365 is a control plane for AI agents that enables organizations to adopt agents at scale with proper oversight and guardrails. Microsoft Agent 365 extends your existing management, security, and governance processes and solutions to agents. It helps you control, observe, secure, and govern agents across your organization.

This Learning Path covers the Agent 365 experiences including:

- Microsoft Agent 365 and its capabilities
- How to use Microsoft Agent 365 to manage your agents

Modules in this learning path:

- Get started with Microsoft Agent 365
- Monitor and manage agents with Microsoft Agent 365

Prerequisites

- None
